

REACH SERVICE SALES GOALS WITH SERVICE360™ AUTO QUOTE SOLUTION

AUTOMATE LOW-DOLLAR, HIGH-VOLUME SERVICE SALES

With Service360 Auto Quote, you can rest assured that you will capture high-volume, low-dollar sales opportunities that most organizations frequently overlook. Auto Quote provides a low-touch, no-touch approach to delivering service quotes to your customers, ensuring that all service renewals and unattached products (products sold without a service contract) are addressed.

Through automation, we make it easier than ever for your sales organization to make sure that all service contract opportunities – no matter how small – are being pursued quickly, efficiently and at a low sales cost. Now, you can take command of your overall sales strategy, and spend more time focusing on critical high-dollar opportunities. Service360 Auto Quote will take care of the rest: we'll deliver customized and branded service quotes direct to your customers. With our proven automated solution, it's never been easier to reach your service sales goals.

EXECUTE A LOW TOUCH SOLUTION TO INCREASE REVENUE

MaintenanceNet automates the quote creation process, helping you achieve higher sales conversion rates. The Auto Quote solution pre-validates quotes to ensure you are selling the “right” service for your customers' critical products, reducing the number of quote and order errors. Professional, branded electronic quotes are then delivered monthly to customers via e-mail on your behalf, making quoting convenient and efficient.

The Auto Quote solution integrates with the Service360 Data Core to present complete and accurate customer information and product and service details. The quotes generated are based on a targeted date range of service opportunities and include information on the contract expiring and/or product that is uncovered by service.
